About Me

Computer engineering student focused on web development and back-end systems. Proficient in Python and currently advancing skills in ASP.NET Core. Comfortable working in Linux environments, quick to adopt new tools. Seeking internships or junior web developer roles where I can apply clean coding practices and grow in full-stack development and secure software design.

Education

Islamic Azad University, Central Tehran Branch, Bachelor in Computer Engineering – Aug 2024 – present
Tehran, Iran

Projects

plancli

A cross-platform terminal-based to-do list application written in C#
